

## Genee X Series Range

All-inclusive video conferencing and meeting collaboration tool, the X Series touchscreens comes complete with Windows 365 and Skype for Business. No additional equipment is necessary so it really is the complete package.

With its crystal clear and precise InGlass technology, screen presentations can be conducted with ease. Writing on a touchscreen has never felt so accurate, smooth and natural, giving business professionals that extra confidence when presenting in front of an audience.

With a sleek and contemporary design, the X Series range requires just one touch to start a meeting and you're up and running. A single touch can also transform the screen into an interactive whiteboard, where presenters can annotate, share ideas and comment with other meeting members.

Team collaboration is seamless, the X Series allows for a full Bring Your Own Device (B.Y.O.D.) experience. Simply connect the way you want through your smart phone, tablet, or laptop. This makes for the perfect solution to use in combination with an array of collaboration software including Genee's own Spark II and Project Flow.

The X Series is available in 65", 70", 75" & 86".

## Key Features & Benefits

**Spark II Software**  
The ultimate boardroom presentation software designed for ease of use, is free with our G-Touch screens.

**Project Flow Software**  
Encourages collaboration and enables the presenter to gain live instant feedback during a presentation. \*90 Day Free Trial

**Enhanced Acoustics**  
Acoustic echo cancellation and noise reduction technology enables meeting participants to be heard clearly across a 8-metre room.

**Comprehensive Connectivity**  
Multiple HDMI, USB and AV front facing ports.

**InGlass Technology**  
Utilising the latest InGlass technology, the X Series allows presenters to annotate with ease and produce interactive presentations.

**Interchangeable Video Cameras**  
Two interchangeable front-facing cameras, positioned at the top and bottom of the screen, providing crisp video conferencing.

**High Quality Sound**  
Two high quality front facing speakers, allowing the whole room to hear a presentation or video clearly.
